Experience

Final-Year Engineering Internship in Web3 Development Feb 2026 – Aug 2026
Defendr.gg *Tunis, Tunisia*

- Built the rewards system of an esports platform: players earn five types of tournament prizes, achievements, trophies, medals and organisation badges, attributed automatically when a tournament ends, with real-time notifications.
- Let players own their rewards as NFTs minted to their own wallet on four chains (Ethereum, Rootstock, Hedera, Solana), and convert red coins, blue coins, crypto and cash between them (Stripe).
- Gave organisers and admins the tools to create and distribute rewards, with KPI dashboards and AI-assisted reward creation.

Summer Internship in Mobile Development July 2025 – Aug 2025
IT-Youb Consulting *Tunis, Tunisia*

- Built a cross-platform fitness app in Flutter with interactive exercise videos and 3D animations.
- Integrated a NestJS API (users, categories, Firebase video streaming) and designed the navigation and search UI.

Summer Internship in Software Development July 2024 – Aug 2024
IT-Youb Consulting *Tunis, Tunisia*

- Produced interactive 3D workout videos for 100 exercises (Blender, After Effects) delivered through Firebase.
- Developed the NestJS API for video and metadata management, with Python automation of the pipeline.

Internship in Blockchain Development Feb 2023 – June 2023
Datarox *Tunis, Tunisia*

- Built an NFT marketplace in React for a 10,000-NFT collection, synchronized with OpenSea.
- Integrated MetaMask for secure interaction with the Ethereum smart contracts (Solidity, Truffle).
- Built an admin dashboard for live monitoring of NFT sales and properties.

Internship in Mobile Development Jan 2022 – Feb 2022
Tabhotel Digital *Ariana, Tunisia*

- Developed a cross-platform Ionic app (iOS/Android) for booking personalized celebrity video messages.
- Integrated the Django backend and Stripe payments for the booking flow.

Education

Institut Supérieur des Arts de Multimédia de Manouba Manouba, Tunisia
Engineering Degree in Computer Science and Multimedia *Sep. 2023 – Oct. 2026*

Institut Supérieur des Études Technologiques de Charguia Tunis, Tunisia
Bachelor's Degree in Information Technologies *Sep. 2020 – June 2023*

Projects

Wyrmx | *Python web framework* June 2025 – present

- Author of a NestJS-inspired framework on FastAPI/Uvicorn: dependency injection, decorators, routing, Pyright typing, Alembic migrations.
- CLI that generates Cython-accelerated FastAPI projects from natural-language prompts.

Safezone | *Incident-reporting mobile app* Feb 2025 – present

- Real-time urban safety app: geolocated alerts, interactive map, community reports (Flutter front, NestJS API).
- Push notifications for nearby incidents, image reports stored on IPFS, and daily AI safety tips generated from local incident history.

Skills

Programming Languages: TypeScript, JavaScript, Python, Dart, Solidity, Rust, Java, C/C++
Backend: NestJS, Node.js, Express, FastAPI, Django, Spring Boot, REST, RabbitMQ, MongoDB, PostgreSQL, Firebase
Frontend & Mobile: Next.js, React, Angular, Flutter, Ionic
Web3: Hardhat, Truffle, Anchor, ethers.js, Metaplex, IPFS, Ethereum, Solana, Hedera, Rootstock
Tools: Git, Docker, GitHub Actions, Linux, Postman, IntelliJ IDEA, VS Code
Spoken languages: Arabic (native), French (fluent), English (fluent)
